

BLACKQUARTZ

_BIOGRAPHY

_BLACKQUARTZ is the alter ego of Lucas Urbano.

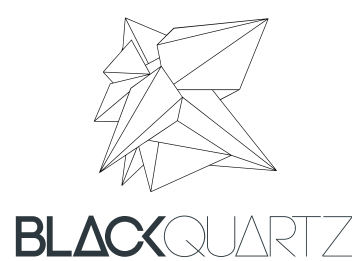

_This natural producer from Seville, although recently Swiss adopted, is first and foremost a soul's looking for quality and innovation in electronic music with own spirit.

_Listen, analyze and evolve are important aspects to him, especially when speaking of electronic music and new trends.

_In 2014, after taking part in several projects, he decided to start this project by himself, fusing acoustics with more organic electronics.

_His productions are full of evocative moments, fusing styles such as Electronic, Downtempo, NuJazz, NeoSoul and IDM..., always trying that the audience not remain indifferent.

_On his debut album "Skyfall" that will be released in May 2018, he presents two different proposals:

- . The first one as band adding to its live vocalists, drums and keyboards.
- . The second one, more personal, intimate that can get from the most introspective to the most danceable.

_Actually he's ultimating his next LP.

_Each song has a story behind for him and this album has a lot to tell.

_This is Black Quartz.
